

# MATT'S PARTY HIRE

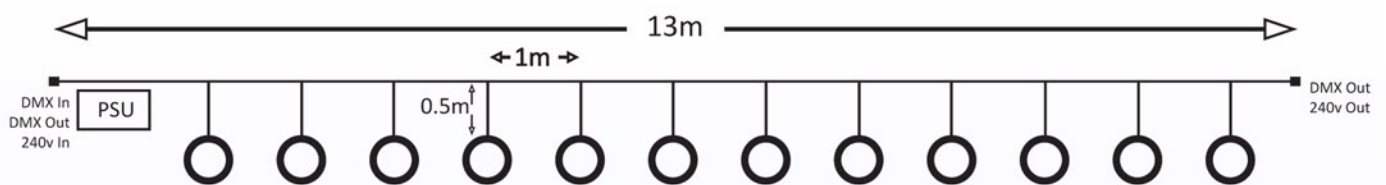

Product Info:

## MPH LED-Ball

MPH developed the **MPH LED-Ball system** with two applications in mind. Firstly they can be used as a stunning visual effect with the ability to 'map' video through them to easily create a very large low resolution display. The second use would be for outdoor lighting.

The balls are based loosely on traditional 'Festoon' style lighting. The systems has been designed so the strings can be daisy chained making them ideally suited to parklands, festival lighting and ambient mood lighting.

### General Information:

- Each MPH LED-Ball comes pre-rigged in a string of 12x Balls
- MPH LED-Ball is rated for indoor and outdoor use (Ip66)
- Balls can be controlled individually to achieve any combination of colours
- Travel in trays (1x string per tray) in a stillage of 3 or 4 trays

### Weight:

- MPH LED-Ball on string c/w Power Supply - 35kg

### Construction:

- Balls: White Opaque Plastic 300mm Diameter
- Power Supply: Black PVC Box

### LED Type:

- 81pcs high power LEDs

### Power requirements:

- 1x LED-Ball String consumes 240v 0.9a max.

### Control:

- Via DMX 3ch (RGB) per Ball, 36x per string.

### Connections:

- Power Supply End: 240v Power - DMX in/out/through
- Opposite End: 240v Power Female - DMX out
